PROFESSIONAL SUMMARY

Full-Stack Software Engineer with 5 years of experience (4+ full-time) building production SaaS platforms with C#, .NET 8, ASP.NET Core Web API, Angular 18 and SQL Server. Lead engineer on a compliance platform processing 25,000+ drug and alcohol tests monthly, where I designed the microservices architecture, REST APIs and a hybrid EF Core/Dapper data layer that cut average API response time by 60%. Experienced in Stripe and SendGrid integrations, Azure DevOps CI/CD with Docker, and code review, taking work from requirements through production.

TECHNICAL SKILLS

Languages: C#, TypeScript, JavaScript (ES6+), T-SQL, Python

Backend: .NET 8 / .NET Core, ASP.NET Core Web API, ASP.NET MVC, .NET Framework, REST APIs, Microservices, Swagger/OpenAPI, RBAC, Webhooks, Stripe API, SendGrid, Google Maps API

Frontend: Angular 18, React, HTML5, CSS3, jQuery, Responsive UI

Databases and Data Access: SQL Server, Entity Framework Core, Dapper, Stored Procedures, Indexing and Query Optimization, MongoDB, Redis Caching

Cloud and DevOps: Microsoft Azure (App Service, Functions, Service Bus, Key Vault), AWS, Azure DevOps, CI/CD Pipelines (YAML), Docker, Git

Testing and Quality: Unit Testing, Integration Testing, xUnit, Code Reviews

Other: Mentoring, OpenAI API, GitHub Copilot

EXPERIENCE

Software Engineer | Enest Technologies Pvt. Ltd., Mohali, India | Aug 2022 - Present

Lead engineer, Imperans: compliance SaaS platform for TDDA (New Zealand), processing 25,000+ drug and alcohol tests monthly across Australasia under ISO 17025 accreditation standards

- Own architecture, delivery and stakeholder communication end to end, from requirements through production deployment; designed the microservices architecture, including database schema, service boundaries and API contracts.
- Built a hybrid data access layer using EF Core for writes and Dapper for reads, cutting average API response time by 60% (1.2 s to 450 ms).
- Integrated Stripe with idempotent webhook handlers to prevent duplicate charge processing, and automated SendGrid notifications that reduced missed alerts by 85%.
- Designed role-based access control (RBAC) for 100K+ users with real-time audit tracking, and built an automated clinical report generator that saved 75% of administrative drafting time per cycle.
- Used the OpenAI API with structured prompts for automated report generation and internal task automation; use GitHub Copilot in day-to-day development.
- Used Azure App Service, Azure Functions, Azure Service Bus and Azure Key Vault in the Imperans cloud architecture.
- Built and maintained 15+ CI/CD pipelines with Azure DevOps (YAML) and Docker, cutting manual deployment effort by 85% and increasing release cadence 4x.
- Mentor 3 junior developers through code reviews and Angular best practices, contributing to a 20% reduction in post-release defects.

Software Engineer Intern | Enest Technologies Pvt. Ltd., Mohali, India | Aug 2021 - Jul 2022

Converted to full-time within 12 months

- Delivered 10+ core API modules and led a legacy SQL schema refactor that stabilised high-traffic endpoints.
- Optimised T-SQL stored procedures and indexing strategies, reducing query execution time by 30% on high-traffic endpoints.
- Built modular, responsive Angular components and improved mobile responsiveness.

PROJECTS

Pharmacy First | .NET Framework, ASP.NET MVC, SQL Server, jQuery, HTML/CSS | 2021 - 2022

- Regulated UK online pharmacy and doctor consultation platform serving 50,000+ customers, offering prescription medications, OTC products and online clinical consultations.
- Built e-commerce and patient consultation workflows across the full stack, from front-end forms to API handlers and SQL Server stored procedures.
- Worked within healthcare compliance requirements, including data privacy and prescription validation flows.

EDUCATION

IK Gujral Punjab Technical University | B.Tech in Information Technology, CGPA: 7.7 / 10 | 2018 - 2022
